

LUBRICATORS

Most pneumatically operated equipment such as valves, cylinders, and air tools, require some form of lubrication to reduce equipment maintenance and prolong life.

Air driven devices can be lubricated by using an air line lubricator, a device for adding lubricating oil in aerosol form into the compressed air line. The air passing through the lubricator transports the lubricant to air tools, cylinders or other air driven devices where the lubricant is deposited on moving and sliding surfaces to reduce friction and wear.

Arrow offers four distinct types: Miniature, Arrowfog, Ultrafog, Wick Style.

Miniature Fog-Type lubricators are designed for low air flow applications where space is limited.

Arrowfog in TriStar and Midflow lubricators are the most popular units for applications that do not require extremely fine oil particles or long distance lubrication. They produce oil particles of 2.5 micron. Arrowfog sends all metered oil down line in fog droplets; accommodates a wide range of applications.

Arrow Ultrafog in Tri-Star and Midflow lubricators produce extremely fine, .4 micron oil particles. Due to their size, these molecules remain in suspension and are carried further downstream than the particles from an Arrowfog. Arrow Ultrafog allows precise adjustment control. Atomizes oil droplets to a fine mist for reclassification in the bowl before sending lighter particles of oil down line.

Arrowwick lubricators are economical and reliable for lubricating tools or cylinders that run constantly. The Arrowwick automatically maintains the same air-oil ratio regardless of variations in air flow. The average droplet size is 3 microns. Arrowwick uses an adjustable saturated wick to send particles or oil down line.

Miniature Fog Lubricators

SPECIFICATIONS

WARNING! Polycarbonate plastic bowls could rupture if exposed to incompatible chemicals whether inside or outside the bowl. If such chemicals are present, use a metal bowl.

Body

- Zinc, black coated

Polycarbonate Bowl

- Max. pressure 150 psi
- Operating temperature range 40°F to 125°F

Metal Bowl

- Black coated aluminum
- Max. pressure 200 psi
- Operating temperature range 40°F to 175°F

Recommended Oil

- SAE 10 oil or lighter
- Atomized average 2 micron
- .1 scfm to establish drip rate

KITS

Bowl Kits

- Polycarbonate BK1811
- Metal BK1811M
- Repair kit RK1812
- Dome Kit AK35

Mounting Kit see page 65

- Mounting kit FBK3

FEATURES

- 1 oz. polycarbonate bowl
- Optional metal bowl
- Visible drip rate
- Easy to refill
- Fine adjustment screw
- Requires only .1 cfm of air flow to operate
- Automatically adjusts oil mist delivery with air flow variations

Arrowick Lubricators

SPECIFICATIONS

- Body**
- Black coated aluminum
- Metal Bowl**
- Steel, black coated
 - Max. pressure 250 psig
 - Operating temperature range 40°F to 200°F
- Recommended Oil**
- SAE 10 oil or lighter
 - 30 scfm to establish drip rate

KITS

- Bowl Kits**
- 29 oz. metal BK4106M
 - 29 oz. metal with sight BK4106W
 - 2 qt. metal with sight BK4106LCM
- Repair Kits**
- For 4106, 4106LCM, 4108, and 4108LCM RK4106
 - For 4112 and 4112LCM RK4112
 - Sight kit WK35

- Applications**
- Single point
 - Flow can be reversed

FEATURES

- Simple, trouble free design. It cannot be over-filled, and has greater bowl capacity which extends interval between filling
- Can be used downstream of 4 way valves because it accommodates reverse flow
- Bowl fills all the way to the top
- It can be filled under pressure no need to shut down air
- Tamper-proof internal adjustment
- Porous bronze oil metering diffuser introduces smallest possible oil particles to the air
- No small orifices to clog and stop oil delivery
- Automatically maintains air-oil ratio regardless of variations in air flow
